

AVShowrooms "Gold Show Award High End Munich Best Sound"

Nominated "Hifi Pig Loves You" Award

"one of the best sounding rooms at the show"

Brandenburg 432 EVO MASTER, a high-end stereo system featuring a digital source with a DAC, a CD player, and a tuner, all housed in a single unit. The system is powered by a 432 EVO MASTER amplifier and driven by two large, light-colored wooden floor-standing speakers. The setup is illuminated by warm spotlights against a dark background.

We were at the top position of Awarding houses Munich Best Sound!

2. Hifi Pig nominated "Hifi Pig Loves You Award"

"one of the best sounding rooms at the show"

Hifi Pig also visited the room, and was listed in [the top 5 systems](#) of their [160-page show report](#) and nominated for the the "Hifi Pig Loves You" award.

Hifi Pig [writes](#) :

When someone, whose opinion you trust about high end hifi, tells you that a room sounds so beautiful it moved them to tears...you make sure you go into that room and have a serious listen. Jack at BD Audio had not steered us wrong! A visually stunning room featuring Aries Cerat Symphonia horn loudspeakers, that are wonderfully made from wood, and their hefty Concero 65 monoblock valve amplifiers, plus more of their electronics. There was an equally stunning Vyger Indian Signature turntable, 432 EVO music server and the system was fully cabled with Tellurium Q Silver Diamond with Ultra Silver power cables.

Now this is all very high end gear, it's big and unashamedly bold so a feast for audiophile eyes as well as ears. They were playing classical music when we went in, normally not something that appeals to me but if music that I don't normally listen to can captivate me then it's a good sign. It really was simply stunning and definitely one of the best sounding rooms at the show...also one that we will make a beeline for next year and hopefully get to hear a wider variety of music too.

3. Moiz Fidelity system recordings

So how did it sound? Our friends from Moiz Fidelity made some great video's. All music played back was in 440 Hz mode, with SQi enabled. This again proves the 432 EVO MASTER can at least match or outperform any other digital music source (streamer, server, player, cd transport,) in any price range now available.

The 432 EVO MASTER is a true cost-is-not-object class music server, without having to pricetag of the ultra expensive high-end gear.

Real natural sound:
