

Lost in streaming? Welcome to 432 EVO, the best sounding digital source now in reach for many. Winner of [best of show at Munich 2017](#) , among best of show [in 2 rooms at X-Fi](#) , New Music Brussels show, ...

Warm analog sound from digital? Yes it's possible thanks to our live 432 Hz plugin, which 90% prefers over the original! Purists can also enjoy one of the best bitperfect sources now on the market.

432 EVO offers sublime silent music servers from the ultra affordable STANDARD up to cost-is-not-object MASTER class beating many super expensive CD transports. It also competes against more expensive servers without any effort.

All models with Roon 1.6 (full roon, not just an endpoint!) or LMS and switch between both in 10s, bitperfect TEAC ripdrive, at least a 2 TB SSHDD (or even more!), real-time kernel, 10 upsample recipes, 432 Hz processing or just bitperfect: you choose!
